

## Earth Day Canada - Jour de la Terre Canada – April 22, 2020

April 22, 2020 marks the 50th anniversary of Earth Day.

Let's do what we can to make earth a better place!

Visit the following websites to view videos related to Earth Day:

<https://youtu.be/6WA8FpGI5Sw>

[https://youtu.be/OasbYWF4\\_S8](https://youtu.be/OasbYWF4_S8)

This year we are spending Earth Day at home. I am challenging my students to research Earth Day 2020 and inform themselves of activities that they can complete to do their share for Earth Day 2020. This could be a change that will continue every day!

View this site: <https://earthday.ca/april-22/campaign/earthdayathome/>

You will be introduced to environmental actions to do at home. When you scroll down this page you will find 5 categories; ***Food, Energy, Waste, Sustainable mobility and Nature***. Click on these links to find out more! You will not be able to do everything, pick ideas that can be completed by you and your family over a period of time. Maybe create a new habit? What things can you do?

Don't limit your research to this site. Search for more information.

Choose at least one activity/environmental action that interests you, create a plan (about how you and your family can accomplish this activity), introduce the plan to your family and discuss "How" you can make this plan work as a group.

How to document this Environmental Action:

1. Do the research and watch the videos.
2. Choose an activity (Your choice! What could you do? )
3. Jot down your plan. (How will you do this activity? - point form of ideas to discuss with your family)
4. Present your ideas. Choose **how you would like to share** the Environmental Action chosen. This could be a written essay, a poster, a power point presentation, a video, a picture, an Art project, a song, a poem...(your choice).
5. No due date! Work at your own pace! Have fun! I would love to hear about and/or see your ideas!
