

## **Home Learning: April 20-24**

I hope you all had a fabulous weekend! I see that a lot of you have tried the reading website. I am very proud of you! I can see your progress and I am impressed! Don't forget to try the STEAM challenge of growing things without soil. I have started my green onions. So here are some at home learning activities for this week:

**Math**: continue working on the math site: Splashlearn (found in the weblinks section). If you completed activities last week, try some different things this week.

**Measurement**: I need you to take out your data collection of the snow that you did. This week, we are going to use that data and make a bar graph. You will need paper or graph paper (either will work), a ruler and a pencil. Please watch the following video to help in showing how a graph is made:

[https://www.mathplayground.com/video\\_bar\\_graphs.html](https://www.mathplayground.com/video_bar_graphs.html)

Please use your data to make your own bar graph. If you do not have graph/grid paper, it is ok to use other paper. I have left some pictures of my graphs in the gallery of pictures. Check them out. I did one on plain paper and one on grid to show you. Afterward you may want to play a graphing game using the following link: <http://www.learnalberta.ca/content/me3us/flash/> Click on Data Analysis and play the game Using Bar Graphs

Next, please watch the following video on millimeters, centimeters and meters:

<https://www.youtube.com/watch?v=mhpfvNbiPE>

Now, I need you to do some investigating around your house and yard. Tell me 5 things each that you would measure using millimeters as a unit, 5 that you would use centimeters and 5 that you could use meters to measure. I'm excited to learn what you have found.

**Reading:** Please remember that it is important to read every day for at least 20 minutes. Keeping up with your reading strategies and comprehension is so important. You can read a chapter book, picture book, magazine or you can read some of the selections on the RAZ kids reading site. (found in the weblinks) I have also left directions on how to login just in case you haven't yet. **I did notice that a lot of you have! YAY for you!** The username is nancyhambrook123 and password is King1.

**Writing:** Please try to write for 15-20 minutes each day.

On April 22 of every year, we celebrate Earth Day. Earth Day is a day that we really reflect on ways to help and take care of our Earth. This week's writing activities should reflect that. I am going to give you some ideas to help. Watch the video to help you get into the swing of things. <https://www.youtube.com/watch?v=yI3zgcL0Tv8>

**#1.** Create an Acrostic Poem using the word : **EARTH DAY**. We did these before using Christmas words.

**E** everyone should help out.

Air pollution

Recycle when you can.

T

H

D

A

Y

**#2.** Write about the different ways we can take care of our environment and why this is important.

**#3.** Make an Earth Day poster. I know some of you will love that!

**#4.** Create a craft using recyclables. Write about what you created and what materials you used.

I know that each of these things is different from when we are at school, but I know that you are doing the best you can. I miss you and hope that you are doing well. 😊

Take care and remember if you have any questions you can reach me through my email: [nancy.hambrook@nbed.nb.ca](mailto:nancy.hambrook@nbed.nb.ca)
