What is Nessie?

Loch Ness Monster/Nessie is a large marine creature.

Some people believe in Nessie and some people don't , but there is no real proof that Nessie really exists.

Nessie Facts

- Scientists say that Nessie is just a European Anguilla eel.
- Scientists say that Loch Ness Lake contains no Monster DNA.
- There has been over 3000 recorded sightings of Nessie.
- The Loch Ness Lake is the largest freshwater lake in Britain.

Similar Creatures

Did you know that there may be dozens , if not hundreds of lake monsters around the world.

These are some similar creatures to Nessie:

1. Champ
2. Ogopogo
3. Mokele-mbembe

Champ

- Champ is a sea serpent that lives in Lake Champlain.
- There has been over 300 sightings of champ in the world.

Ogopogo

- Ogopogo is a lake monster found in Lake Okanagan.
- There has been over 200 Ogopogo sightings in the world.

Mokele-mbembe

- Mokele-mbembe is a dinosaur like creature.
- It's said to be up to 35 feet long.

My Thoughts About Nessie

I think Nessie could be real because I've heard a lot of facts and seen a lot of pictures of Nessie.

THE END
