### Extra-Curricular (10-15 min)

### Canada-Red maple leaf

-Please complete the red sheet that was sent out a few weeks ago.

\*\*\*Write everything you know about Canada in French.

# The following are no-tech math activities that can be done around the house without the use of technology. Some of them can be fun for the whole family!

- · Card Games: Crazy 8s, Go Fish, Uno, Rummy, Crib, War etc.
- Board Games: Monopoly, Checkers, Chess, Yahtzee, Snakes and Ladders, etc.
- Cooking: Follow recipes to work on fractions and measurement. For example, find a healthy snack recipe and either double or half the batch.
- Data Analysis: Make simple graphs representing data over time (such as tracking the daily weather, how many birds visit your bird feeder, how many minutes you use technology or watch television, etc).
- Estimation: Estimate the cost of your grocery bill, the time it takes to do a task, lengths of objects, distances walked, etc.
- Geometry: Go for a nature walk in your yard or neighbourhood and record how many objects match 2D and 3D geometric shapes. For example, the sun looks like a circle or a sphere, the fronts of some houses look like rectangles, etc. Bring a piece of paper and a pencil to record what you see.
- Time: Practice telling time using digital and analog clocks.
- Measurement: Find the perimeter and area of one or more rooms in your house. If you don't have a tape measure, use something else as a measuring tool. For example, a shoe, a book, a box, etc.
- Patterns: Get 10 books and arrange them according to size. How else can you arrange them? Try this with other types of objects such as shoes, toys, pens/pencils/markers, etc.
- Number Sense: What do you get when you double the number 1? Keep doubling your answer and see how far you can get without using a calculator. You may want to do this with a pencil on a piece of paper.
- · Calendar: How many days until your birthday? What about the other members of your family?
- Math Journal: Write about a situation where 5 is a small number then write about a situation where 5 is a big number.
- Just for fun: Include your favorite number in every sentence you say. Don't tell anyone what you're doing and see if they figure it out.
